Toyota Land Cruiser FJ-55 built from 1973

-> product name of EZ-unit =

Toyota Land Cruiser FJ-55 73> LHD or RHD

The product name of EZ-unit you want to order:

Additional information:

Our EZ units are designed to work with 12V and negative earth systems. On a 24V vehicle we have the option to (retro)fit a converter. This converter will balance the load over both 12V batteries. This way the batteries will have a longer life span in comparison with the option of just using one battery to achieve the 12V needed for the system.
